Re: Extension on Large Mining Operations Form.

Dear Mr. Gallegos:

We meet with the S.C.S. yesterday and they have agreed to assist us on filling out the permit for a Large Mining Permit. They told us that they could not complete the information we need by the 24th of April. Our County Surveyor is still trying to complete the maps needed and he will also need an extension. It was very unfortunate that we did not receive the information and forms needed to comply with this request. Fausett's did not get this information and I had to finally call and request the information from your office. I did not receive it until April 6, 1995, and I was not in the Office for a few days after.

We are working on the parts of the permit that we can complete and the S.C.S said that they would try to complete their soil and vegetation information. We feel that this should be done correctly and with no guess work. If we do it correctly the first time then we should not have to do it again for awhile. Our surveyor has been working on several projects that require Federal Compliance to get assistance from the Federal Government. This work is being done on nine bridges rated below 50 they are (actually rated 14 or so). We will not be able to pull him off this project until April 20, 1995. He should then start work on this project until it is completed.

Again we are trying to complete this when possible. We would like to ask for an extension until **May 15, 1995**, we should have the permit completed and returned to you on or hopefully before. Please consider our extension and we will try to complete it sooner if possible. Thank you for your time and consideration on this permit, and we would appreciate any help that you may have to offer. I know that the day you stopped by it made it a lot clearer for both Leon and me. Thanks again.

Sincerely Yours,

*Nancy L. Bird*
